

# Rock Castings

---

Let dry completely, 30-45 minutes then gently peel off the mold

# Rock Castings

---

Then apply a second batch of rocks to fill in the gaps

# Rock Castings

---

Here's our unblended cliff face

# Blending it all together

---

# Blending it all together

---

Mix sculpt-a-mold to the  
consistency of cottage  
cheese

# Blending it all together

---

Apply and smooth with a spatula.

# Blending it all together

---

# Blending it all together

---

And continue blending with a stiff paint brush

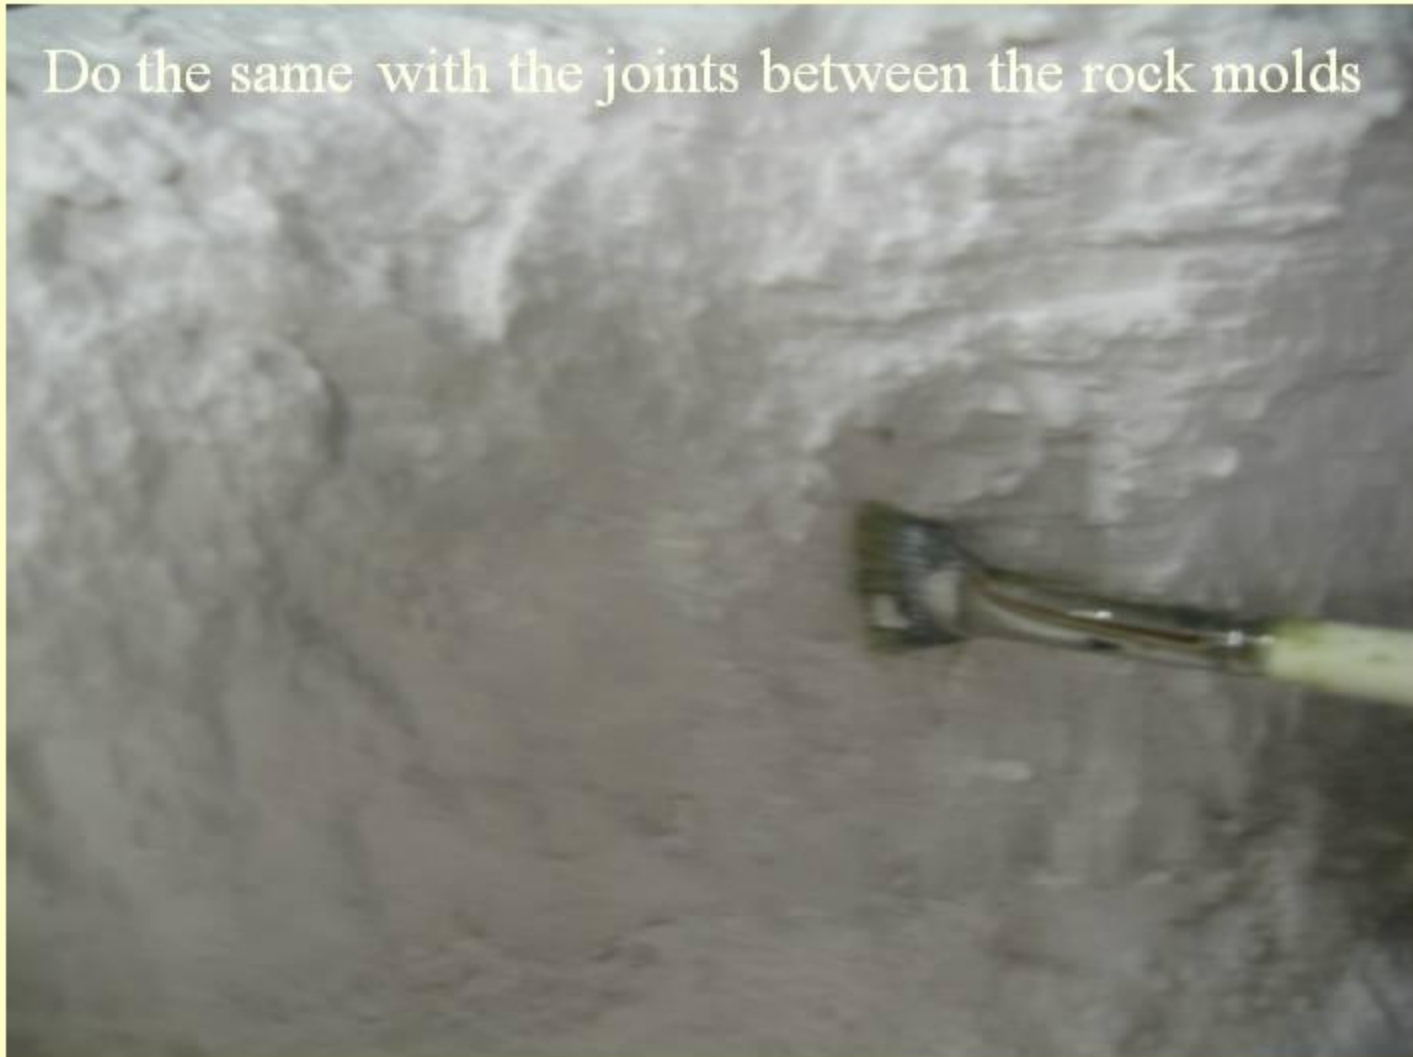

# Blending it all together

---

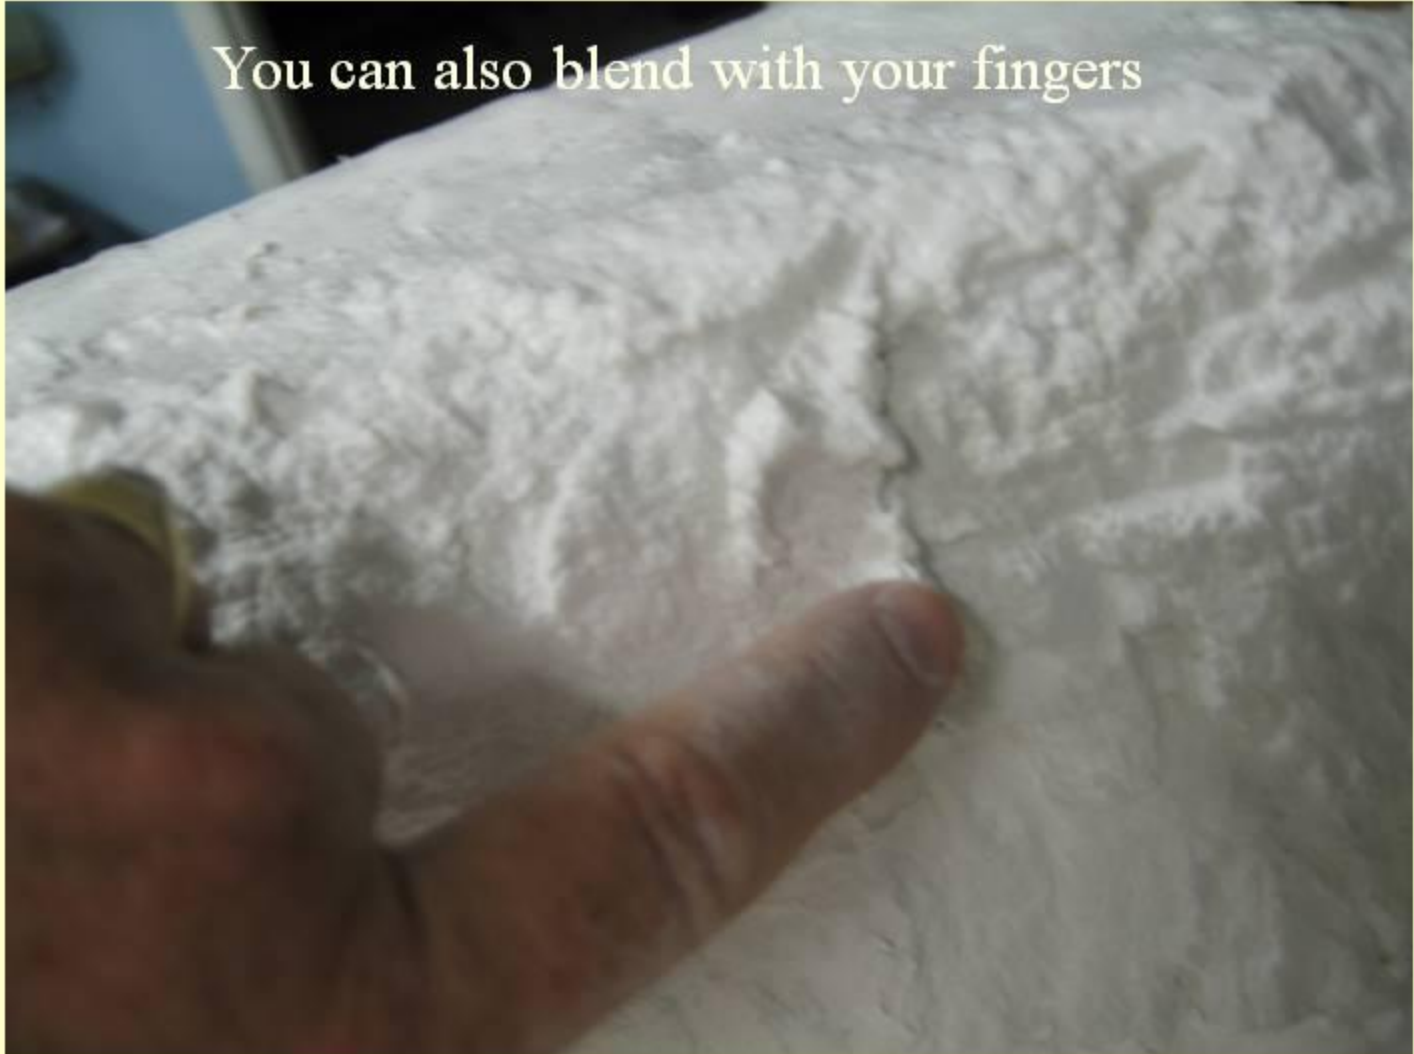

Do the same with the joints between the rock molds

# Blending it all together

---

You can also blend with your fingers

# Blending it all together

---

For a less textured blending, use joint compound

# Blending it all together

---

# Blending it all together

---

# Blending it all together

---

# Dirt Cuts

---

Cover with joint compound, smooth with a spatula  
and blend horizontally with a brush
